INDEX: VOLUME 28

AUTHORS AND SUBJECTS

Abstracted system 219–232.
Action 109–125.
Arousal systems 253–267.
Association 35–52.
Atkinson, Carla & Milsum, John H. A system model of the metabolic response to stress. 268–273.
Attitude change 233–250.
Bahm, Archie J. Five systems concepts of society. 204–218.
Bailey, Kenneth D. Relationships among conceptual, abstracted, and concrete systems. 219–232.
Bauer, Connie L.: see Stan A. Kaplowitz.
Behavior 274–283.
Bias, rotation group 135–153.
Book Reviews:
Allen, T. F. H. & Starr, T. B. *Hierarchy: Perspectives for ecological complexity*, (Robert W. Bosserman, rev.). 305–306.
Jantsch, E. *The evolutionary vision: Toward a unifying paradigm of physical, biological, and sociocultural evolution*, (Ervin Laszlo, rev.). 84–87.
Mitsch, W. J., Bosserman, W. R., Ragade, R. K. & Dillon, J. A., Jr. (Eds.). *Energetics and systems*, (Robert A. Herendeen, rev.). 307–309.
Park, C. C. *Ecology and environmental management, a geographical perspective*, (John T. Finn, rev.). 306–307.
Bordley, Robert F. A central principle of science: Optimization. 53–64.
Bosserman, Robert W.: see book reviews, T. F. H. Allen.
Bosserman, R. W.: see book reviews, W. J. Mitsch.
Brewer, Garry D. Some costs and consequences of large-scale social systems modeling. 166–185.
Brewer, Marilynn B.: see Richard Parker.
Cardiovascular disease 268–273.
Catastrophe theory 79–83.
Casuality 126–134.
Central systems 253–267.
Commons dilemma 298–304.
Communications thermometer 14–23.
Complexity 109–125.
Computer 1–3, 154–165, 298–304.
Concepts of society 204–218.
Conceptual systems 219–232, 274–283.
Concrete systems 219–232.
Cybernetics 204–218.
Cyert, Richard M. & Simon, Herbert A. The behavioral approach: With emphasis on economics. 95–108.
Cyert, Richard M., Fienberg, Stephen E., & Larkey, Patrick D. Introduction to methodologies for the study of social systems. 91–94.
Data, missing 135–153.
Decision making 1–3, 4–13, 14–23, 35–52, 65–78, 95–108, 109–125, 135–153, 166–185, 233–250, 253–267, 298–304.
Descrepant messages 233–250.
Differentiation 191–203.
Dillon, J. A., Jr.: see book reviews, W. J. Mitsch.
Dynamic model 79–83.
Economics 95–108.
Ehrman, Lee: see Ira B. Perelle.
Emergentism 204–218.
Energenetics 191–203.
Energy 274–283.
Equilibrium, market 79–83.
Errors, nonsampling 135–153.
Etzioni, Amitai. A top management computer. 1–3.
Explanation 126–134.
Extension 191–203.
Feedback 4–13.
Feedback, negative 253–267.
Feekes, Gerrit B. Hierarchy of energy systems. 191–203.
Fienberg, Stephen E. & Tanur, Judith M. Large-scale social surveys: Perspectives, problems, and prospects. 135–153.
Fienberg, Stephen E.: see Richard M. Cyert.
Fink, Edward L.: see Stan A. Kaplowitz.
Finn, John T.: see book reviews, C. C. Park.
Firm 95–108.
Flood, Merrill, Lendenmann, Karl & Rapoport, Anatol. 2 × 2 games played by rats: Different delays of reinforcement as payoffs. 65–78.
Game theory 65–78.
Global systems 191–203.
Glymour, Clark. Social science and social physics. 126–134.
Group 14–23, 65–78, 109–125, 135–153, 298–304.
Herendeen, Robert A.: see book reviews, W. J. Mitsch.
Hierarchy of systems 191–203.
Hierarchy theory 24–34.
Holonism 204–218.
Human being 253–267, 268–273.
Individual 233–250.
Individual human being 35–52, 253–267, 284–297.
Individualism 204–218.
Information flow diagram 268–273.
Interviewing, telephone 135–153.
Kramer, Roderick: see Richard Parker.
Kaplowitz, Stan A., Fink, Edward L. & Bauer, Connie L. A dynamic model of the effect of discrepant information on unidimensional attitude change. 233–250.
Large-scale models 166–185.
Larkey, Patrick D.: see Richard M. Cyert.
Laszlo, Ervin: see book reviews, E. Jantsch.
Laterality 284–297.
Lefthandedness 284–297.
Lendenmann, Karl: see Merrill Flood.
Linear hierarchies 24–34.
Living systems 24–34.
Lui, Layton: see Richard Parker.
Management theory 4–13.
Management tracking system 1–3.

INDEX: VOLUME 28

Lui, Layton: see Richard Parker.
Management theory 4–13.
Management tracking system 1–3.

Market equilibrium 79–83.
Mathematical hierarchies 24–34.
Memorial article 188–189.
Messages, discrepant 233–250.
Messick, Chris: see Richard Parker.
Messick, David M.: see Richard Parker.
Metabolism 268–273.
Methodology 126–134, 154–165.
Miller, Carol Louise: see James Grier Miller.
Miller, James Grier. Carol Louise Miller (memorial article). 188–189.
Milsum, John H.: see Carla Atkinson.
Missing data 135–153.
Model, dynamic 79–83.
Modeling 154–165.
Models, large-scale 166–185.
Negative feedback 253–267.
Neural systems 253–267.
Optimization 53–64.
Organicism 204–218.
Organizations 1–3, 4–13, 95–108, 298–304.
Parker, Richard, Lui, Layton, Messick, Chris, Messick, David M., Brewer, Marilynn B., Kramer, Roderick, Samuelson, Charles, & Wilke, Henk. A computer laboratory for studying resource dilemmas. 298–304.
Perelle, Ira B. & Ehrman, Lee. The development of laterality. 284–297.
Philosophy 126–134.
Popper, Roger D. A thermomenter for measuring the health of communications systems. 14–23.
Pottinger, Garrel. Explanation, rationality, and microeconomic theory. 109–125.
Preference 109–125.
President of U.S. 1–3.
Prisoner's dilemma 65–78.
Probability matching behavior 35–52.
Q-System 219–232.
Ragade, R. K.: see book reviews, W. J. Mitsch.
Ramaprasad, Arkalgud. On the definition of feedback. 4–13.
Rapoport, Anatol: see Merrill Flood.
Rational choice 35–52.
Rationality 109–125.
Raz, John von Briesen. Probability matching behavior, association, and rational choice. 35–52.
Reason 109–125.
Reinforcement 65–78.
Research methodology 154–165.
Resource use 298–304.
Righthandedness 284–297.
Rotation group bias 135–153.
R-system 219–232.
Sampling without replacement 35–52.
Samuelson, Charles: see Richard Parker.
Schizophrenia 253–267.
Science 53–64.
